

A Non Surgical System for the Treatment of Periodontal Disease

Wednesday, February 17, 2009 6:30 - 8:30pm

Anne Bosy is the Chief Science Officer and Founder of the OraFresh™ System – a unique, non-surgical intervention for the treatment of periodontal disease and related oral infections. Anne first gained international recognition as a result of her ground-breaking research proving that periodontally healthy individuals can suffer from advanced oral infections, and specifically chronic halitosis. She has published articles in the Journal of Periodontology and other peer review journals as well as the popular press and has presented in Europe, Japan, the US and Canada. She received her education in dental hygiene from the University of Toronto and completed a Master of Education and a Master of Science at the same University. Today Anne is recognised internationally as a world-class expert in the field of oral health research.

PROPOSED OUTLINE FOR EVENING PRESENTATION

The oral-systemic link and the changing role in dentistry
Why tissues treated with traditional treatment methods continue to bleed and recede.
How to evaluate the mouth for oral infection using OraFresh™ methods.
Reducing the chance for implant failure.
Benefits of the OraFresh™ System to your dental practice.

Tuition fee is \$29 per session.
Space is limited.
